Forecast for Monday 22 May 2023

Weather: Any early valley mist soon clearing to leave a dry morning with plenty of sunshine. Some fair-weather cloud bubbling up by the end of the morning and this may increasingly give some cloudier spells during the afternoon. There's a low chance of a rogue shower developing later in the day, but the vast majority of the area will remain dry. Feeling warm in the sunshine but a little cooler on the tops with a brisk northerly breeze.

Chance of cloud-free hill tops above 600m: 90% or more throughout.

Low cloud and visibility: Periods of cloud during the day but this will stay above the peaks. Locally poor visibility in any dawn mist patches but otherwise very good visibilities with distant hills and landmarks clear to see.

Meteorologist's View

Despite feeling a little cool in the breeze on the summits, the sun is very strong and there will be high or very high UV levels. It's important to protect your skin from the harmful UV rays and stay hydrated if spending the day in the hills.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Sat 20 May 2023	0mm	0mm	0mm

Forecast for Tuesday 23 May 2023

Weather: A locally chilly start to the morning but soon warming up with some hazy sunshine. Remaining dry throughout the day albeit somewhat cloudier than recent days. Not feeling quite as warm due to cloudier skies, but winds will be lighter.

Maximum wind: Northerly 10-15 mph.

Chance of cloud-free hill tops above 600m: 90% or more throughout.

Low cloud and visibility: A few scraps of cloud at around 500-600m on north facing slopes at first, otherwise cloud free with clouds above the summits. Generally very good visibilities.

Temperature: **Valleys:** Plus 4 Celsius rising to plus 20 Celsius.
At 600m: Plus 8 Celsius rising to plus 14 Celsius.
Freezing level: Well above the summits.
